SUBJECT INDEX

ABDOMEN, Distribution of fluids in, 36; hæmorrhages of, in newborn, 49; silent perforation of gastric ulcer with free gas and fluid in, without clinical signs, 119; importance of anaërobic bacilli as agents of infection of organs of, 127; effect of operations on, on mechanism of respiration, 128; treatment of tuberculosis of, in female, 221; intercostal neuralgia of wall of, 299; adhesions in right upper quadrant of, 299; postoperative complications of appendicitis, 307; exploration of, in cases diagnosed cholecystitis or cholelithiasis before operation, 310; subhepatic perivisceritis, 313; localization of pain in, 400; chronic mesenteric lymphangitis as focal infection in, and connecting link for so-called second disease of, 479; disappearance of liver dullness in acute conditions of, 488; fistula from uterus to wall of, following cæsarean section, 495

Abortion, Late results of, in women with pulmonary tuberculosis, 45

Abscess, Treatment of subpectoral, 23; origin of suppurative perforation, 160; use of bacteriophage filtrates in treatment of suppurative conditions, 242, 432; intra-abdominal postoperative complications of appendicitis, 307; treatment of certain inflammations and suppurations with bacteriophage, 432. *See also* names of organs

Acetabulum, Operation for defective, in congenital dislocation of hip, 510

Achlorhydria, Anæmia associated with, 514

Acid-base balance, Influence of local and lumbar anæsthesia on, after operation and importance of preparation of patient as regards this relationship, 162

Actinomycosis common to man and animals, 348

Addison's disease, Incidence of atrophy and tuberculosis of adrenal glands and their relation to, 497

Adhesions in right upper quadrant of abdomen, 299

Adrenals, *See* Suprarenals

Ambard's constant, Nephrectomy for tuberculosis performed on basis of, 412

Anæmia, Blood transfusion as therapeutic procedure for, 240; plastic linitis of acute evolution accompanied by severe, 391; simple achlorhydric, 514

Anaërobes, Infection with gas-forming, in surgical affections, 77; importance of, as agents of infection of abdominal organs, 127; infection by anaërobic streptococci in puerperal fever, 495

Anæsthesia, Arteries and, 72; mental confusion, headache, and Parinaud's syndrome after spinal, 72; cyclopropane for induction of, 73; in rectal surgery, 160; influence of local and lumbar, on acid-base balance after operation and importance of preparation of patient as regards this relationship, 162; alleged disasters following avertin, 162; observations on spinal, 243; control of avertin, with thyroxin, 243; regional and spinal, induced with percaine, 342; avertin rectal, 342; experimental, induced with avertin and sodium amytal, 343; comparative value of splanchnic and spinal, in treatment of experimental ileus, 393; extemporaneous evacuations of uterus at end of pregnancy under spinal, carried out during 1929 at Montpellier Maternity Hospital, 408; perforation of bladder at site of tuberculous ulceration of apex during cystoscopy under epidural, 412; reduction of simple fractures of extremities under local, 426; use of controllable spinal, in 500 major operations, 432; controllable spinal, induced with spinocain, 433; avertin, in obstetrics, 494; effect of spinal, on uterine contractions, 494; modern problems of, with reference to postoperative complications, 518

Anaphylaxis and gastric ulcer, 300

Aneurism, Treatment of, of thoracic aorta and innominate artery by distal arteriovenous anastomosis, 66; erosion of vertebræ by, 147; of femoral artery due to bullet wound cured by ligation, 239; intracranial arteriovenous, with pulsation exophthalmos, 381

Angiospasm, Relation of retinal, to disease of arterioles, 283

Anosmia, Traumatic, 197

Antithrombin, Nature, effect, and site of origin of, in organism and its clinical significance from diagnostic, prognostic, and therapeutic standpoints, 67; clarification of objections to diagnosis of early pregnancy on basis of determinations of, 67

Antrum of Highmore, Plastic closure of openings between antrum and buccal cavity, 106; iodized oil as aid in diagnosis of maxillary sinus disease, 284; conservative treatment of chronic maxillary sinusitis, 466; radical maxillary sinus operation, 466

Aorta, Healed rupture of, 22; treatment of aneurisms of thoracic, and innominate artery by distal arteriovenous anastomosis, 66; erosion of vertebræ by aneurism of, 147; thrombosis of abdominal, 155

Aponeurosis, Arthroplasty with strips of fixed, 336; fresh strips of, as suture material, 342

Appendectomy, Cæcocolic invagination as complication after, 124

Appendicitis, And vegetative nervous system, 124; proper time for operations in childhood, 157; bacteriology and pathogenesis of, 208; in children, 305; 800 consecutive operations for, 306; intra-abdominal postoperative complications, 307; chronic mesenteric lymphangitis as abdominal focus of infection and connecting link for so-called second disease of abdominal cavity, 479; mortality of, 484, 485

Appendix, Recognition of mucocele of, 31; importance of anaërobic bacilli as agents of infection of abdominal organs, 127; strangulated hernia due to ruptured, 299; epithelial tumors of, 308; influence of inflammation of, on pelvic organs and vertebral column, 396; cæcovesical fistula of appendicular origin, 484; spirochætosis of, 485

Arteries, Syndrome of obliteration of, of thrombo-angiitis type in lower extremities observed for nine years, 66; and anæsthesia, 72; combination of irradiation and Wertheim operation with ligation of internal iliac, in carcinoma of cervix, 132; obliterations of, of venous origin, 239; relation of retinal angiospasm to arteriolar disease, 283; pressure in, and oscillometric index in Basedow syndromes, 379; total necrosis of half of goiter after ligation of both main, 467

Artery, Treatment of aneurisms of thoracic aorta and innominate, by distal arteriovenous anastomosis, 66; bullet wound of thigh with aneurism of femoral, in Scarpa's triangle treated by ligation, 239; ligation of femoral, and vein in thrombo-angiitis obliterans, 340

Arthritis, End-results of treatment of ankylosing, by parathyroid extirpation, 63; prostate gland as focus of infection in, 329

Arthrodesis, Of shoulder by osteoperiosteal grafts, 235; extra-articular, of hip for coxalgia, 235, 236, 425; anatomical specimens of, of hip for old coxalgia, 235; bony fixation of foot in infantile paralysis by subastragalar, 425
Arthrolysis, New method of, applied to ankylosis of jaw, 463
Arthroplasty with fixed sponeurotic strips, 336
Atelectasis, Mechanism of obstructive pulmonary, 21; relation of postoperative, to postoperative bronchitis and pneumonitis, 474
Atlas, Fracture of odontoid process of axis with anterior luxation of, without cord symptoms, 151
Avertin, Alleged disasters following anæsthesia induced with, 162; control of, anæsthesia with thyroxin, 243; experience with use of, for rectal anæsthesia, 342; anæsthesia induced with, and sodium amytal, 343; use of, in childbirth, 494; anæsthesia induced with, in obstetrics, 494
Axis, Fracture of odontoid process of, with anterior luxation of atlas without cord symptoms, 151
Azotæmia in presence of stricture of urethra, 413

BACILLUS pyocyaneus, Septicæmia due to, 524
Back, Pain in, related to inflammation of appendix, 396; treatment of disabilities resulting from low derangements of, 423
Bacteriophage, 431; use of, filtrates in treatment of suppurative conditions, 242; in infections of urinary tract, 331; in surgery, 342; treatment of inflammations and suppurations with, 432; treatment of staphylococcus infections with, and staphylococcus mycolysates, 432
Basedow's disease, *See* Goiter
Besredka's reaction in diagnosis of tuberculous salpingitis, 490
Biceps brachialis, Disinsertion of tendon of insertion of, 505; intracapsular rupture of long head of, 505
Bile, Surgical significance of white, according to clinical observations at operation and results of successful attempts to produce hydrops of biliary tract in animals, 210; composition of, following relief of biliary obstruction, 398; biliary factors in development of peptic ulcer, 479
Bile duct, Reflux of pancreatic and duodenal secretions through drainage tube in common, 212; stones of common, of liver origin, 312; complications and sequelæ of prolonged jaundice due to obstruction of common, 486
Bile ducts, Immediate causes of death following operations on gall bladder and, 399
Biliary tract, Regulation of reaction of blood in diseases of, 27; lipiodol studies of postoperative biliary fistulæ, 126; surgical significance of white bile according to clinical observations at operation and results of successful attempts to produce hydrops of, in animals, 210; composition of bile following relief of obstruction of, 398; resorption from, 398
Birth injuries, Prevention of, 49; intrathoracic and intra-abdominal hæmorrhages in newborn, 49; rupture of liver in newborn after spontaneous birth, 50; clinical and autopsy study of 165 newborn infants, 226; postmortem pathology of newborn, 226; stillbirth due to intracranial injury, 226; anatomical study of subdural hæmorrhage associated with tentorial splitting in newborn, 496
Bismuth in treatment of syphilis, 350
Bladder, Cystography in infancy and childhood, 54; vascular pedicles and peritoneum of, in man, 54; leiomyomata of, 55; malignant tumor of, in boy three years of age, 56; retention of urine in, 58; staphylococci in production of urinary concretions, 59; treatment of certain neoplasms of, by intravesical resection of entire wall of, with peritoneal coat, 145; pancreatic, in domestic cat, 213; cystin calculi, 229; management of new growths of, 229; traumatic rupture of, and urethra, 327; preliminary drainage in obstruction of, by stricture of urethra, 328; stones in, in experiments on animals, 411; perforation of, at site of tuberculous ulceration during cystoscopy under epidural anæsthesia, 412; submucous fibrosis of outlet of, in infancy and childhood, 412; urinary calculi in infancy and childhood, 416; cæcovesical fistula of appendicular origin, 484
Blood, Demonstration of thyroid hormone in, of hyperthyroidized dogs, 16; regulation of reaction of, in gastric and biliary tract diseases, 27; influence of lumbar sympathectomies and of ablation of stellate ganglion of sympathetic on regulation of sugar of, by pancreas, 35; fluctuations in sugar of, during eclampsia, 44; cessation of coagulation of, in postpartum hæmorrhage, 48; fetal bacteræmia, 318; effect of stagnation of urine on localization in kidney of bacteria circulating in, 324; comparative values of calcium and glucose as agents for decreasing clotting time of, 340; grouping and transfusion of, 341; chronic meningococcus septicæmia, 348; nephrectomy for tuberculosis performed on basis of Ambard's constant, 412; tumor of adrenal gland with fatal hypoglycæmia, 497; examination of, and surgical tuberculosis, 505; autoplastic graft of, in bone cavities, 507; roentgen rays in hæmopathy, 514; hæmohistioblastosis with special clinical and hæmatological characteristics, 514
Blood pressure, Arterial, and oscillometric index in Basedow syndromes, 379; cause of low, produced by muscle injury, 523
Blood transfusion, Lecithin as substance capable of inhibiting hæmo-agglutination, 67; experimental studies of, 68; scientific and practical importance of, 68; transition of blood-group antibodies from mother to fetus, 155; syphilis after, 156; in pre-operative preparation and postoperative treatment, 157; as therapeutic procedure, 240; observations on blood grouping and, 341; fatal reactions to, 430; influence of, on function of bone marrow, 514
Blood vessels, Vascular pedicles of bladder, 54; of menisci of knee joint, 62; thoracic and lumbar sympathetic ganglionectomy in diseases of peripheral, 110; reaction of endothelium of, as basis of thrombus formation, 155; anatomoclinical records of surgery of, 428
Bone, Analogies between various aseptic necroses of, 60; grafts of, in ununited fractures, 236; resorption of, 332; nature of Ewing's tumor of, 335; problems of malignant disease from standpoint of radiologist, 344; recurrent and so-called metastatic giant-cell tumor, 419; histological researches on evolution of, graft, 422; transplantation of fine fragments and spicules of, 507; autoplastic graft of blood in cavities in, 514
Bone marrow, Influence of blood transfusion on function of, 514
Bones, Results of treatment in 265 cases of tuberculosis of, and joints, 148; experimental detachment of epiphysis and rachitiform changes produced by strontium, 150; proper time for operations in childhood, 157; diffuse osteoplastic carcinoma of, from clinically unrecognized primary carcinoma of prostate, 230; difficulties and fallacies in roentgenological diagnosis of hydatid infection, 246; carbon-arc-light treatment in tuberculosis of, and joints, 332; specificity of action of, light

in tuberculosis, 332; study of, in tabes and syringomyelia, 333; diagnosis and treatment of tumors of long, 418; apparatus for obtaining general relaxation of soft parts in reduction of fractures and dislocations of long, 426; changes in, in hyperparathyroidism, 468; metastases in, in cancer of breast, 474; non-specific diseases of epiphyses during period of growth, 504; blood examination and surgical tuberculosis, 505
Botulism, Histological background of ocular syndrome in, 281
Brain, Otitic complications, 13; treatment of open injuries of, in children, 18; injuries to head, 18; calcifications of pia mater of angiomatous origin demonstrated by roentgenography, 19; tumors of central nervous system, 109; diseases of central nervous system in which pain is main symptom, 110; contributions of otology to neurology, 194; clinical study and surgical treatment of abscess of, of otomastoid origin, 194; papillomata of choroid plexus, 195; stillbirth due to intracranial injury, 226; cisterna magna pressure syndrome, 290; gumma of, 291; importance of visual fields as aid in localization of tumors of, 291; pathologico-anatomical study of fatal intracranial subdural hæmorrhages of newborn of non-traumatic origin, 323; intracranial arteriovenous aneurism with pulsation exophthalmos, 381; reaction of central nervous system to vaccinia virus, 382; chronic subdural hæmatoma, 383, 471; spinal metastases in case of cerebral glioma of type known as astrocytoma fibrillare, 383; cerebrospinal metastases from unsuspected pulmonary carcinoma, 389; effects of depressed fractures of skull, 469; traumatic injuries of, 469; trephination of skull at a distance as method of diagnosis and treatment of intradural complications of otic origin, 470; diagnosis and treatment of suprasellar tumors, 471; meningeal abscesses of otitic origin, 472; importance of ophthalmology in surgery of nervous system, 472; anatomical study of subdural hæmorrhage associated with tentorial splitting in newborn, 496
Breast, Tuberculosis of, 21; significance of sanguineous discharge from nipple in relation to cancer of, 21; radium treatment of carcinoma of, 112; operation for carcinoma of, 200; gelatinous carcinoma of, 294; problems of malignant disease from standpoint of radiologist, 344; effect of treatment with mammary extracts on genital tract and endocrine system, 350; extemporaneous histological examinations in course of surgical interventions in tumors of, 386; treatment of carcinoma of, by radiation, 386; Paget's disease of nipple, 386; fat necrosis of, 386; bone metastases in cancer of, 474
Bronchi, Injury and repair of, 201; carcinoma of, 295; primary malignant intrathoracic tumors, 389; postoperative obstruction of, 474
Bronchiectasis, 294; treatment of, by multiple stage lobectomy, 389
Bronchitis, Relation of postoperative, to postoperative atelectasis and pneumonitis, 474
Bronchoscopy, For pulmonary abscess following tonsillectomy, 14; as aid to surgeon in pulmonary abscess following tonsillectomy, 285
Brow presentation, 140
Brunner's glands, Relation of, to genesis of gastroduodenal ulcer, 299
Buerger's disease, *See* Thrombo-angiitis obliterans

CÆCUM, Recognition of mucocele of, 31; inflammatory volvulus of ileocæcal portion of intestine, 121; cæcocolic invagination as complication after appendectomy, 124; renocæcal fistula shown by X-ray examination, 143; diagnosis of inflammatory tumors of, 396; fistula of appendicular origin involving, and bladder, 484
Cæsarean hysterectomy, 321
Cæsarean section, Use of forceps and, in labor, 47; status of, in modern obstetrics, 47; place of low, in treatment of hæmorrhage due to placenta prævia, 321; 874 cases of cervical, performed at Chicago Lying-In Hospital, 408; fistula from uterus to abdominal wall following, 495
Calcaneus, Operative treatment of compression fractures of, 427
Calcium, Comparative values of, and glucose as agents for decreasing clotting time, 340
Calvé-Legg-Perthes disease, *See* Osteochondritis deformans juvenalis
Cancer, Rational method of procedure in irradiation of malignant tumors, 75; carcinoma and lymph gland metastases, 164; cytological differences between normal and malignant tissues, 249; problems of malignant disease from standpoint of consulting radiologist, 344; spontaneous tumors of rat, 347; invasion of epidermis by carcinoma, 348; radiotherapy of malignant tumors in Sweden, 435. *See also* names of organs
Capillaries, Permeability of, in inflamed area, 163; study of roentgen-ray erythema by capillaroscopy, 244
Capillaroscopy, Study of roentgen-ray erythema by, 244
Carbohydrate metabolism, Rôle of placenta in, of fetus, 136; effect of isolation of tail of pancreas on, 312
Carbon arc light, Treatment of bone and joint tuberculosis with, 332; results of treatment of intestinal tuberculosis with, 522
Carcinoma, *See* Cancer and names of organs
Cardiolysis, 114
Cardiospasm, Clinical manifestations and therapy of so-called, 205
Carotid nerve, Anatomical and physiological study of, 384
Carpue, Joseph Constantine, and revival of rhinoplasty, 275
Cataract, Permeability of lens capsule with reference to etiology of senile, 105; capsulotomy method of lens expression, 189
Catgut, Sterility of, 73
Cauda equina syndrome due to fibrosarcoma of dura mater, 109
Cervicitis, Pathology of, and relation between, and cervical cancer, 217; histological data concerning chronic, and precancerous conditions of cervix, 403
Chest, Hæmorrhages in, in newborn, 49
Cholangeitis, 311; and hepatitis, 311
Cholecystitis, Short-circuit operations in treatment of, 211; modern aspects of, and cholelithiasis, 211; abdominal exploration in cases diagnosed as, before operation, 310; bacteriological and experimental study of 300 gall bladders resected for, 399; emptying of gall bladder after recovery from, 485; relation of hepatitis to chronic, 485
Cholecystogastrostomy, Short-circuit operations in treatment of cholecystitis, 211
Choledochoduodenostomy, External, 35; importance of external, in treatment of gall-stone disease, 126; short-circuit operations in treatment of cholecystitis, 211
Choledochus, *See* Bile duct
Cholelithiasis, *See* Gall stones
Chondromatosis, Articular, 335
Choroid, Traumatic rupture of, with detachment and spontaneous re-attachment of retina, 379
Choroid plexus, Papillomata of, 195
Cisterna magna pressure syndrome, 290

Cleft palate, Repair of, with extensive loss of palatal tissue, 284; and harelip, 466
Club foot, Proper time for operations in childhood, 157; pathogenesis of congenital, 420
Collective review: Acute hæmatogenous osteomyelitis of adolescence, 5
Colon, Etiology of diverticulitis of, 29; treatment of diverticulitis of, 33; pathogenesis and treatment of gastroenterocolic fistulæ, 120; cæcocolic invagination as complication after appendectomy, 124; total volvulus of small intestine and right half of, 207; total intussusception of, treated by colectomy and colostomy, 208; choice of operative procedure for carcinoma of, not including rectum and rectosigmoid, 208; primary sarcoma of descending, and sigmoid, 209; tests of hepatic function in cases of neoplasm of, with and without metastasis to liver, 211; adenomatous polyps of, and rectum, 305; multiple carcinomata of, 305; serious digestive disturbances related to malformations of duodenum and right, treated by anterior gastrojejunostomy, colocolostomy on transverse, and colopexy of right, 394
Colpotomy, Manipulations for exteriorization of uterus in conservative operations performed by, 38
Common duct, *See* Bile duct
Complement-fixation test, Analysis of results of, in hydatid disease, 350
Connective tissue tumors of limbs, 248
Cornea, Nerves of, in man and rabbit studied by vital staining, 464
Corpus luteum, Effects produced on ovary by graded doses of extract of, 492
Coxalgia, Extra-articular arthrodesis of hip for, 235, 236, 425
Cyclopropane a new anæsthetic, 73
Cystadenoma, Analysis of cases of pseudomucinous, in which cysts were not ruptured before operation, 404
Cystic duct, *See* Bile duct
Cystitis, Secondary to non-bacillary kidney lesions, 144; emphysematous, 229
Cystography in infancy and childhood, 54
Cystoscopy, Perforation of bladder at site of tuberculous ulceration of apex during, under epidural anæsthesia, 412
Cysts, Hæmorrhagic, of neck, 192. *See also* names of organs

DEFORMITIES of leg, Reconstructive surgery in paralytic, 337
Delmas method, Extemporaneous evacuations of uterus at end of pregnancy, 408
Diabetes, Paralysis of oculomotor nerve trunks in, 198
Diaphragm, Pathological elevation of, in pregnancy, 42
Diaphragmatic hernia, Phrenic nerve stimulation in, 215; phrenic neurectomy as treatment of, 313
Diathermy, Technique in management of new growths of bladder, 229; in treatment of cancer of larynx, 288
Disease, Surgically treated case of Hirschsprung's, 33; thoracic and lumbar sympathetic ganglionectomy in peripheral vascular, 110; nature of Kuemmell's, 233; Paget's, 386; relation of atrophy and tuberculosis of adrenal glands to, 497; Hoffa's of subpatellar fatty tissue, 507
Dislocations, Apparatus for obtaining general relaxation of soft parts in reduction of fractures and, of long bones, 426. *See also* names of joints
Diverticulitis, Etiology of, 29; treatment of, with sigmoiditis, 33
Drop-foot, End-results of bone-block operation for, 338
Duodenitis, Duodenal ulcer, gastric ulcer, and, 395
Duodenum, Diagnostic and therapeutic errors in field of digestive diseases and their prevention, 25; experimental chronic ulcers of stomach and, produced by deviation of alkaline juices of, 28; treatment of perforated peptic ulcer, 28; recognition of duodenojejunal diverticula, 31; periduodenal hernia, 31; surgery of diverticula of, 122; failures after resection for ulcer of, 206; chronic stasis of, 208; reflux of secretions of, through drainage tube in common bile duct, 212; relation of Brunner's glands to genesis of gastroduodenal ulcer, 299; relation of medicine to surgery in treatment of ulcer of, 301; acute perforation of, 392; cause of sudden pain in perforation of ulcer of, 392; operative results in partial and subtotal gastrectomy for gastroduodenal ulcer, 393; digestive disturbances related to malformations of, and right colon treated successfully by anterior gastrojejunostomy, colocolostomy on transverse colon and colopexy of right colon, 394; chronic stenoses of, 394; duodenitis, ulcer of, and gastric ulcer, 395; biliary and hepatic factors in peptic ulcers, 479; carcinoma of, 483; value of resection for exclusion in non-resectable ulcer of, 483
Dura mater, Fibrosarcoma of, causing cauda equina syndrome, 109

EAR, Contributions of otology to neurology. 194; clinical study and surgical treatment of brain abscess of otomastoid origin, 194; complications in, in scarlet fever, 283; pathological changes in meningitis of internal, 379; trephination of skull at distance as general method of diagnosis and treatment of intradural complications of otic origin, 470; meningeal abscesses of otitic origin, 472
Echinococcosis, Difficulties and fallacies in roentgenological diagnosis of hydatid infection. 246; results of complement-fixation test in hydatid disease, 350. *See also* names of organs
Eclampsia, Fluctuations in blood sugar during, 44; results of treatment of, in Stockholm Obstetrical Institute, 44; ten years of, and its treatment, 224
Elbow, Results of treatment of tuberculosis of, 148
Embolism, Thrombosis and, 71; effect of abdominal operations on pulmonary, 128; pre-operative preparation and postoperative treatment, 157; prevention of thromboses and, following operation by feeding of thyroxin, 158; mortality from thrombosis and, in Holland, 224
Empyema, Roentgenological aspects of, 113; proper time for operations in childhood, 157; acute, 475; treatment of acute, in children, 475; surgical treatment of tuberculous, 476
Encephalitis, Hæmorrhagic, following salvarsan treatment during pregnancy, 44; experimental vaccinial, in monkey and rabbit with special reference to problem of, following vaccination in man. 382
Encephalomyelitis, Acute disseminated, as sequel to "influenza," 291
Endocarditis, Simple acute, in puerperal infection, 48
Endocrine glands, Effect of treatment with follicular, lutein, and mammary extracts on genital tract and, 350
Endometrioma of crural region, 316
Endometrium, Free implantation of, on peritoneum of guinea pigs, 134; connective tissue lesions of collagenic framework of, in "functional" menorrhagia and metrorrhagia, 401
Epididymis, Frequent association of tuberculosis of, and tuberculosis of kidney, 498; pathogenesis and etiology of cystic formations of, 502
Epididymitis, Chronic, in adult, 413

Epilepsy, Generalized, of essential type in case of ampullar dilatation of superior longitudinal sinus, 18; laboratory studies of, 470
Epiphyses, Non-specific diseases of, during period of growth, 504
Epistaxis, 105
Epulis, Histogenesis of so-called congenital, 106
Erysipelas, Treatment of, in infants with anti-streptococcus serum, 342
Ewing's tumor, Nature of, 335
Exophthalmic goiter, *See* Goiter
Exophthalmos, Intracranial arteriovenous aneurism with pulsation, 381
Exostosis bursata, 418
Eye, Interpretation of defects in visual field, 104; variations in refraction of visual and extravisual pupillary zones, 104; treatment of malignant tumors of, and orbit by radiation, 189; Krukenberg's spindles, 189; histological background of ocular syndrome in botulism, 281; treatment of tuberculosis of, with tuberculin, 282; Wills Hospital Clinic for treatment of ocular syphilis, 282; orbital cellulitis in children, 377; perforating injuries of, by small steel fragments, 377; destructive purulent ophthalmia accompanying eruptive fever with stomatitis, 464; chiasmal syndrome of primary optic atrophy and bitemporal field defects occurring in adults with normal sella turcica, 470; importance of ophthalmology in surgery of nervous system, 472
Eyeball, Perforating wounds of, 281; relations between physicochemical properties of vitreous body and intra-ocular tonus, 378; operations substituted for enucleation of, 378; amputation of anterior segment of, 378
Eyelid, Congenital ptosis of, and its treatment, 463

FALLOPIAN tubes, Actinomycosis of adnexa of female genitalia, 38; late results of simple abortion and abortion with tubal sterilization in women with pulmonary tuberculosis, 45; nerve supply of female genital tract, 134; clinical studies of non-tuberculous salpingo-oöphoritis, 217; intra-uterine injection of lipiodol with perforation of, 219; torsion of normal adnexa, 315; disorders of motor function in gynecology, 493
Fascia, Union of free grafts of, with muscle, 342
Fat, Neutral, and glutathione in liver in experimental icterus due to obstruction, 34
Femoral artery, Aneurism of, in Scarpa's triangle treated by ligation 239; ligation of, and vein in thrombo-angiitis obliterans, 340
Femoral vein, Ligation of, and artery in thrombo-angiitis obliterans, 340
Femur, Solitary plasma-celled myeloma of, 147; osteosynthesis of diaphysis of, with knee flexed, 152; diagnosis and treatment of tumors of long bones, 418; Muzii method for reduction of fractures of diaphysis of, 510
Fetus, Rôle of placenta in carbohydrate metabolism of, 136; transition of blood-group antibodies from mother to, 155; spontaneous inoculation of melanotic sarcoma from mother to, 249; mechanism of intra-uterine infection of, 318; bacteræmia of, 318
Fever, Destructive purulent ophthalmia accompanying eruptive, with stomatitis, 464; chronic, as symptom of epiploitis, 479
Fibula, Diaphysectomy and primary suture for acute osteomyelitis of, 338; diagnosis and treatment of tumors of long bones, 418
Fingers, Rupture of extensor tendon insertions in, 336
Fistula, Treatment of rectovaginal, 40; pathogenesis and treatment of gastro-enterocolic, 120; lipiodol studies of postoperative biliary, 126; unusual late sequelæ of radium therapy, 131; renocæcal, demonstrated by roentgen examination, 143; cæcovesical, of appendicular origin, 484; from uterus to abdominal wall following cæsarean section, 495
Follicular fluid, Experimental investigation of, with regard to uni-ovulation mechanism, 219; effects on ovary of graded doses of, 492
Foot, Results of treatment of tuberculosis of, 148; luxations in region of, 153; fractures of bones of, other than os calcis, 238; bony fixation of, in infantile paralysis by subastragalar arthrodesis, 426
Forceps, Use of, and cæsarean section in labor, 47
Fractures, Osteosynthesis by Cuneo's method, 63; operative treatment of, 150; bone grafts in ununited, 236; surgical operation for vicious consolidation of, 339; apparatus for obtaining general relaxation of soft parts in reduction of, and dislocations of long bones, 426; reduction of simple, of extremities under local anæsthesia, 426. *See also* names of bones
Frontal bone, Primary osteomyelitis of, 13
Frontal sinus, Surgical treatment of inflammation of, and its complications, 189

GALL bladder, Diagnostic and therapeutic errors in field of digestive diseases and their prevention, 25; regulation of reaction of blood in gastric and biliary tract diseases, 27; residual hepatic disturbances after operations on, 33; contraction of, photographed, 34; pharmacodynamic effects on, 125; intramural gall stones, 212; acute torsion of, 310; morphology and permeability of epithelium of, 398; immediate causes of death following operations on, 399; bacteriological and experimental study of resected, 399; emptying of, following recovery from acute cholecystitis, 485; bacteriology of operatively removed, 486
Gall stones, External choledochoduodenostomy in treatment of, 126; modern aspects of cholecystitis and cholelithiasis, 211; intramural, 212; abdominal exploration in cases diagnosed cholecystitis or cholelithiasis before operation, 310
Gamna's nodules, Splenomegaly with chronic congestion and, in florid hereditary syphilis, 35
Gangrene, Infection with anaërobic gas-forming bacilli, 77; hæmolytic streptococcus, following administration of scarlet fever antitoxin, 163; treatment of gas, with normal horse serum, 242; of extremities, 246, 436
Gastrectomy, Results of partial and subtotal, for gastroduodenal ulcer, 393; physiological and chemical studies following total, for carcinoma, 480
Gastritis, Operation for failures of operation for gastric ulcer and chronic, 118; recurrent ulcer and, in surgically treated stomach, 118
Gastro-enterostomy, Diagnostic and therapeutic errors in field of digestive diseases and their prevention, 25; technique and results of, 29
Gastro-intestinal tract, Diagnostic and therapeutic errors in the field of digestive diseases and their prevention, 26; unusual tumors of, 26; basal metabolism in cancer of, 27
Gastrojejunostomy, *See* Gastro-enterostomy
Genital organs, Nerve supply of female, 134
Glands, Metastases of carcinoma in lymph, 164; relation of Brunner's, to genesis of gastroduodenal ulcer, 299
Glands of internal secretion, *See* Endocrine glands
Glaucoma, Pathogenesis of acute, 378
Glucose, Comparative values of calcium and, as agents for decreasing clotting time of blood, 340

Glutathione, Neutral fats and, in liver in experimental icterus due to obstruction, 34
Goiter, Toxic, 16; fatal case of exophthalmic, commencing during thyroid gland administration, 107; results of operative treatment of Basedow's disease, 107; endemic, and myxœdema, 192; intrathoracic, 286; management of poor surgical risk with, 286; arterial pressure and oscillometric index in Basedow syndromes, 379; prolonged treatment of exophthalmic, with iodine alone, 380; range of effective iodine dosage in exophthalmic, 287; relation of recurring exophthalmic, to amount of tissue preserved in operation on thyroid, 467; total necrosis of half of, after ligation of both main arteries, 467
Gomenolized oil, Advantages of Mikulicz drain soaked in, in peritonitis, 321
Gonadotrope hormones, Re-activation of senile testis of rat by injections of, 330
Gonorrhœa, Pathogenesis of, 415
Grave's disease, *See* Goiter
Gums, Congenital basal-cell tumors of, 106

HÆMATURIA in hydronephrosis, 324
Hæmohistioblastosis, Case of, with special clinical and hæmatological characteristics, 514
Hæmolytic streptococcus, Gangrene due to, following administration of scarlet fever antitoxin, 163
Hæmophilia, Problem of, 240
Hæmorrhage, hæmostasis, and prevention of bleeding, 512
Hæmorrhoids, Complications of operations for, 210
Hæmostasis, hæmorrhage, and prevention of bleeding, 512
Hallux valgus, Etiology and treatment of, 420
Hand, Rupture of tendons of, 336; dorsal luxation of upper end of metacarpal bones, 426
Harelip, Proper time for operations in childhood, 157; and cleft palate, 466
Head, Injuries to, 18
Headache after spinal anæsthesia, 72
Healing, Effect of moist heat on, by first intention and on reticulo endothelial reaction, 159
Heart, Cardiopathies and pregnancy, 42; cardiolysis, 114; principles of thoracoplastic measures for production of mechanical effect on work of enlarged, 114; preoperative preparation and postoperative treatment, 157; size of, in experimental hyperthyroidism, 287; relation of thoracic sympathetic cardiac nerves in man to cervical sympathetic ganglionectomy, 383
Heat, Effect of moist, on healing by first intention and on reticulo endothelial reaction, 159
Hegar, Accomplishments of, in spirit of Semmelweis, 222
Hepatic duct, *See* Bile duct
Hepatitis, Cholangeitis and, 311; relation of, to chronic cholecystitis, 485
Hernia, Fundamental operative treatment of inguinal, 24; periduodenal, 31; proper time for operations in childhood, 157; phrenic nerve stimulation in diaphragmatic, 215; strangulated, due to ruptured appendix, 299; phrenic neurectomy as treatment of diaphragmatic, 313
Hip, Results of treatment of tuberculosis of, 148; congenital dislocation of, with special reference to anatomy, 151; extra-articular arthrodesis of, for coxalgia, 235, 236, 425; operation for defective acetabulum in congenital dislocation of, 510
Hirschsprung's disease, Surgically treated case of, 33
Hoffa's disease of subpatellar fatty tissue, 507
Horse serum, Treatment of gas gangrene with normal, 242
Humerus, Roentgenographic technique for demonstrating lesions of head of, 64; essential cyst of, treated by operation, 149; affection of head of, resembling Legg-Calvé-Perthes disease of hip, 233; diagnosis and treatment of tumors of long bones, 418
Hydatidosis, *See* Echinococcosis
Hydatiform mole, End-results of curettage for, 403
Hydronephrosis, Absorption in experimental, 142; hæmaturia in, 324
Hydro ureter, Experimental production of, without obstruction, 144
Hyperinsulinism, Surgical treatment of, 312
Hyperparathyroidism, 467; clinical syndrome of, 288; bone changes in, 468
Hyperthyroidism, Size of heart in experimental, 287
Hypertonic salt solution, Intravenous injections of, in grave postoperative toxic and infectious states, 516
Hypoglycæmia, Tumor of adrenal gland with fatal, 497
Hypophysis, Early changes produced in dogs by injections of sterile active extract from anterior lobe of, 350; hyperhypophyseal nanism, 381; roentgenological diagnosis and treatment of tumors of, 383
Hypothyroidism, Postoperative, 287
Hysterectomy, Transcervical drainage in purulent infections of pelvis requiring supravaginal, 222; cæsarean, 321; reconstruction of cervical ligaments after complete, 490; cancer in cervical stump after supravaginal, 490

ICTERUS, *See* Jaundice
Ileocæcal abscess as postoperative complication of appendicitis, 307
Ileum, Roentgen diagnosis of lesions of, 32; inflammatory volvulus of, 121; necrosis of, following pelvic inflammatory disease, 305; peptic ulcer of Meckel's diverticulum and, 396
Ileus, Biliary, 121; intra-abdominal postoperative complications of appendicitis, 307; comparative value of splanchnic and spinal analgesia in treatment of experimental, 393
Iliac arteries, Combination of irradiation and Wertheim operation with ligation of internal, in carcinoma of cervix, 132
Immunity from new point of view, 163
Infant mortality in conservative conduct of labor, 139
Infantile paralysis, Reconstructive surgery in paralytic deformities of leg, 337; bony fixation of foot in, by subastragalar arthrodesis, 425; postural treatment of, 505
Infection, Immunity from new point of view, 163; use of bacteriophage in, 242, 331, 342, 431, 432; method of sterile operation, 431; intravenous injections of hypertonic sodium chloride solution in grave postoperative toxic and infectious states, 516
Inflammation, Measure of permeability of capillaries in, 163; roentgen therapy in acute, 245; treatment of, with bacteriophage, 432; results of roentgenotherapy in, 434
Influenza, Acute disseminated encephalomyelitis as sequel to, 291
Innominate artery, Treatment of aneurisms of thoracic aorta and, by distal arteriovenous anastomosis, 66
Intercostal neuralgia of abdominal wall, 299
Intervertebral disk, Chondroma of, 420
Intervillous space, 136, 137
Intestine, Plasmocytoma of, 30; volvulus of small, 30; resection of 594 cm. of small, because of acute thrombosis of superior mesenteric vein, 31; cure of thrombosis of superior mesenteric vein by resection of entire small, 118; pathogenesis and treatment of gastroenterocolic fistulæ, 120; protection of gastro intestinal sutures by drains and gauze strips, 120; cystic tumors of, and its supporting apparatus, 120; volvulus of

small, 121, 207; typhoid perforation of, operated upon after eighteen hours, 304; carcinoma of small, 481; resection of loop of, for lesion occurring in course of hæmogenic purpura, 512
Intestines, Basal metabolism of patients with cancer of digestive tract, 27; importance of anaërobic bacilli as agents of infection of abdominal organs, 127; postoperative gastro-intestinal paresis and atony, 159; chronic obstruction of, of segmental type, 303; polyposis of, in childhood, 303; problems of malignant disease from standpoint of radiologist, 344; results of carbon arc light treatment of tuberculosis of, 522
Intussusception, Cæcocolic, as complication after appendectomy, 124; total, of colon treated by colectomy and colostomy, 208; complicating visceral purpura, 393; subacute invagination of sigmoid colon into rectum due to sigmoid cancer, 397
Iodine, Range of effective dosage of, in exophthalmic goiter, 287; prolonged treatment of exophthalmic goiter by, 380
Iodized oil, Studies of postoperative biliary fistulæ with lipiodol, 126; intra-uterine injection of lipiodol in case of unrecognized tubal perforation, 219; study of halogenated oils employed in roentgenology, 244; as aid in diagnosis of maxillary sinus disease, 284; effect of injections of, in spinal subarachnoid space, 292
Iris, Leucosarcoma of, 282; sarcoma of, 282
Islands of Langerhans, Experimental study of, *in vivo*, 126; presence of ganglion cells in, 399

JAUNDICE, Neutral fats and glutathione in liver in experimental, due to obstruction, 34; complications and sequelæ of prolonged obstructive, 486
Jaw, Chronic recurring temporomaxillary subluxations, 103; surgical treatment of snapping, 103; resection, plastic operation, and prosthesis of, 104; bone grafting of mandible, 281; new method of arthrolysis applied to ankylosis of, 463
Jejunum, Unusual tumors of gastro-intestinal tract, 26; recognition of duodenojejunal diverticula, 31; roentgen diagnosis of lesions of, 32; primary adenocarcinoma of, 123
Joints, Results of treatment of tuberculosis of bones and, 148; physiopathology of joint cavity in relation to synovia, 232; specificity of light action in tuberculosis of, 332; carbon-arc-light treatment in tuberculosis of, 332; chondromatosis of, 335; autogenous free cartilage transplanted into, 336; occupational therapy in treatment of fracture of, 338; treatment of tuberculosis of, by oleo-arthrosis, 422; peritoneal syndromes in acute articular rheumatism, 478; blood examination in surgical tuberculosis, 505. *See also* names of joints

KERATITIS, Superficial punctate, 465
Kidney, Results of treatment of eclampsism and nephropathy, 44; maximal elimination and conception of normal, before and after decapsulation, 53; infection of, by colon bacilli brought about by disturbances of renal circulation, 53; multiple malignant adenomata of, 53; ureteropyelonephrostomy for urinary obstruction at ureteropelvic junction, 53; routes of absorption in experimental hydronephrotic, 142; lithiasis with anuria in solitary, 142; renocæcal fistula, 143; cystitis secondary to non-bacillary lesions, of, 144; ruptures of spleen associated with rupture of left, 213; cystin calculi, 229; roentgenological diagnosis of hydatid infection, 246; histophysiology of, 324; effect of stagnation of urine on localization in, of bacteria circulating in blood, 324; tuberculosis of, 324; solitary serous cysts of, 325, 326; renal counterbalance in surgical treatment of lesions of, 326; excretion urography, 330; renal pseudorickets, 332; congenital malformations of, and oligohydramnios, 407; perirenal hæmatoma primary with polycythæmia, 411; vesical and renal stones in experiments on animals, 411; nephrectomy for tuberculosis of, performed on basis of Ambard's constant, 412; localization of diseased, by endovenous pyelography, 412; urinary calculi in infancy and childhood, 416; intravenous pyelography as test of function of, 497; frequent association of tuberculosis of epididymis with tuberculosis of, 498; lesions of, secondary to adnexal disease, 498; function of, following resection of, 499; modern problems of anæsthesia with reference to postoperative complications, 518
Knee, Macroscopic and histological findings in menisci of, in different age periods, 61; blood vessels of menisci of, 62; anatomicophysiological characteristics of, of mountaineers, 62; internal injuries of, 62; regeneration of interarticular cartilage of human, 147; results of treatment of tuberculosis of, 148; plastic operation on crucial ligaments of, 150, 508; irreducible traumatic dislocation of, 152; patellar fractures and their sequelæ, 153; cyst of external meniscus of, 234; proliferation of subpatellar fatty tissue of traumatic origin, 507; reconstruction of anterior crucial ligament of, 508
Krukenberg's spindles, 189
Kuemmell's disease, Nature of, 233

LABOR, New manipulation for direct delivery of shoulders with arms extended, 46; paralysis in distribution of nervus ischiadicus in connection with childbirth, 46; causes initiating contractions of, 46; use of forceps and cæsarean section in, 47; prevention of birth trauma, 49; antenatal, natal, and postnatal problems, 50; hydrogen-ion concentration of urine before, during, and after, following normal pregnancy and in toxicoses, 51; functional diagnosis of too narrow pelvis by registration of pains of, 139; infant and maternal mortality in conservative conduct of, 139; maternal mortality, 139, 140, 410; brow presentation, 140; results of obstetrical operations in University Gynecological Clinic of Allmänna Barnbördshuset, Stockholm, 140; physiology of uterus in, 319; management of dry, 320; thymophysin in obstetrics, 320; extemporaneous evacuations of uterus at end of pregnancy carried out during 1929 at Montpellier Maternity Hospital, 408; influence of social changes on maternal mortality and obstetrical problems, 410; avertin anæsthesia in, 494; effect of spinal anæsthesia on uterine contractions, 494
Labyrinth, Surgical treatment of labyrinthine vertigo by évidement of semicircular canals, 379
Labyrinthitis, Ear complications of scarlet fever, 283
Lachrymal gland, Adenocarcinoma of, 464
Landmarks in Surgical Progress: Surgery of century 1830–1930, 1; Joseph Constantine Carpue and revival of rhinoplasty, 275
Larynx, Cause and treatment of cicatricial stenosis of, 288; present status of treatment of cancer of, 288; problems of malignant disease from standpoint of radiologist, 344
Lecithin as substance capable of inhibiting hæmo-agglutination, 67
Leg, Syndrome of arterial obliteration of thrombo-angiitis type in lower extremities observed for nine years, 66; reconstructive surgery in paralytic deformities of, 337
Lens, Relation of permeability of capsule of, to senile cataract, 105; capsulotomy method of expression of, 189
Ligament, Tumors of round, 220; reconstruction of anterior crucial, of knee, 508

Ligaments, Successful plastic operation on crucial, of knee, 150; reconstruction of cervical, following complete hysterectomy, 490
Light therapy, Macroscopic and capillary changes in human skin after combined exposure to roentgen rays and ultraviolet rays, 244; specificity of action of, in tuberculosis, 332; use of carbon arc light in bone and joint tuberculosis, 332; results of use of carbon arc light in intestinal tuberculosis, 522
Lingual tonsil, 14
Linitis plastica, Of acute evolution with severe anæmia, 391; Krukenberg tumor of ovary in case of, 480
Lip, Problems of malignant disease from standpoint of radiologist, 344
Lipiodol, *See* Iodized oil
Liver, Residual disturbances in, after gall-bladder operations, 33; neutral fats and glutathione in, in experimental icterus due to obstruction, 34; intra abdominal hæmorrhages in newborn, 49; rupture of, in newborn after spontaneous birth, 50; value of tests of function of, in carcinoma of colon with and without metastasis to, 211; difficulties and fallacies in roentgenological diagnosis of hydatid infection, 246; embryonic tumor of, containing striated muscle, 309; sympathectomy of portal vein in relation to glycogenic function of, and histological changes in, 310; common-duct stones originating in, 312; cystadenoma of, 398; importance of considering excretion of, in study of blockade of reticulo endothelial system, 437; biliary and hepatic factors in peptic ulcers, 479; relation of hepatitis to chronic cholecystitis, 485; modern problems of anæsthesia with reference to postoperative complications, 518
Liver dullness, Disappearance of, in acute abdominal conditions, 488
Lobectomy, Multiple stage, in bronchiectasis, 389
Longitudinal sinus, Generalized epilepsy of essential type in ampullar dilatation of superior, 18
Lung, Bronchoscopic aspect of abscess of, following tonsillectomy, 14, 285; laryngological aspect of abscess of, following tonsillectomy, 14; mechanism of obstructive atelectasis of, 21; phrenicectomy in treatment of diseases of, 21; thoracoplasty during treatment of tuberculosis of, 22; tuberculosis of, and pregnancy, 42, 318; late results of simple abortion and abortion with tubal sterilization in women with tuberculosis of, 45; massive collapse of, 112; primary carcinoma of left, with cavitation and abscess formation, 113; effect of abdominal operations on mechanism of respiration with reference to embolism and massive collapse of, 128; collapse therapy for tuberculosis of, in pregnant women, 138; pre-operative preparation and postoperative treatment, 157; importance of vital capacity of, in development of postoperative complications in, 158; surgical treatment of tuberculosis of, at Thirty-Eighth French Congress of Surgery, 201; experiences in 600 phrenic nerve operations, 202; difficulties and fallacies in roentgenological diagnosis of hydatid infection, 246; medical aspects of abscess of, after tonsillectomy, 285; factors in healing of abscess of, after tonsillectomy, 285; phrenicectomy in apical and subapical tuberculosis, 294; bronchus carcinoma, 295; problems of malignant disease from standpoint of radiologist, 344; extrapleural thoracoplasty, 387; putrid abscess of, 388; spontaneous pneumothorax following bronchoscopic aspiration of abscess of, 388; gangrenous abscess of, treated by pneumonotomy, 388; primary malignant intrathoracic tumors, 389; cerebrospinal metastases from unsuspected carcinoma of, 389; postoperative pulmonary complications and bronchial obstruction, 474; pathology of primary carcinoma of, 474; corticopleural affections occurring exclusively in infants, 475; modern problems of anæsthesia with reference to postoperative complications, 518
Lymph glands, Metastases of carcinoma in, 164
Lymphadenitis, Treatment of acute suppurative, 23
Lymphadenoma, Etiology of, 515

MALIGNANCY, *See* Cancer and names of organs
Mandible, *See* Jaw
Mastoid, Clinical study and surgical treatment of brain abscess originating in, 194; postoperative management of simple wound of, 379
Mastoiditis, Otitic complications, 13; clinical study of, 105; otitis media and, in infants under three months of age, 283
Maternal mortality, 140; in conservative conduct of labor, 139; results of obstetrical operations in University Gynecological Clinic, Stockholm, 140; relation of mortality from thrombosis, embolism, phlegmasia alba dolens to sudden deaths in puerperium in Holland, 224; causes of, in puerperium, 337; influence of certain social changes on, 410
Maxilla, *See* Jaw
Maxillary sinus, Plastic closure of openings between antrum and buccal cavity, 106; use of iodized oil in diagnosis of chronic disease of, 284; radical operation on, 466; conservative treatment of chronic maxillary sinusitis, 466
Meckel's diverticulum, Peptic ulcer of, 396
Mediastinitis, Tuberculous, 116
Mediastinum, Primary malignant intrathoracic tumors, 389
Megacolon, Surgically treated case of Hirschsprung's disease, 33
Melanoma, Transplantable, of mouse, 347
Meninges, Calcifications of pia mater of angiomatous origin demonstrated by roentgenography, 19; fibrosarcoma of dura mater causing cauda equina syndrome, 109; chronic subdural hæmatoma, 471; abscesses of, of otitic origin, 472; anatomical study of subdural hæmorrhage associated with tentorial splitting in newborn, 496
Meningitis, Relation of localized bulbar cisterna, to caries of petrous apex, 292; pathological changes in, of internal ear, 379
Menopause, Symptoms of myomata of uterus during, 37; symptom-triad of postclimacteric period, 404
Menorrhagia, Connective tissue lesions of collagenic framework of endometrium in "functional," 401
Menstruation, Time of ovulation in menstrual cycle as checked by recovery of ova from fallopian tubes, 134; new physiology of, and its practical implications in obstetrics and gynecology, 220
Mental confusion after spinal anæsthesia, 72
Mesenteric vein, Resection of 594 cm. of small bowel because of acute thrombosis of superior, 31; cure of thrombosis of superior, by resection of entire small intestine, 118
Mesentery, Cystic tumors of intestine and its supporting apparatus, 120; roentgen diagnosis of hydatid infection, 246; chronic mesenteric lymphangitis as abdominal focal infection and connecting link for so-called second disease of abdominal cavity, 479
Metabolism, Basal, in cancer of digestive tract, 27; rôle of placenta in carbohydrate, of fetus, 136; effect on basal, of daily administration of one-half drop, one-quarter drop, and slightly smaller doses of iodine in exophthalmic goiter, 287; effect of isolation of tail or pancreas on carbohydrate, 312; determinations of pulse volume and respiratory, during pregnancy, 407; otosclerosis due to disorder of, 465

Metacarpal, Treatment of fracture of first, 64; dorsal luxation of upper end of, 427
Metrorrhagia, Connective tissue lesions of collagenic framework of endometrium in functional, 401
Mikulicz drain, Advantages of, soaked in gomenolized oil in acute puerperal peritonitis, 321
Mortality, Infant and maternal, in conservative conduct of labor, 139; maternal, in obstetrical operations in University Gynecological Clinic in Stockholm, 140; maternal, 140; relation of, from thrombosis, embolism, phlegmasia alba dolens to sudden deaths in puerperium in Holland, 224; causes of, in puerperium, 337; influence of certain social changes on maternal, 410; of appendicitis, 484, 485
Mouth, Plastic closure of openings between antrum and buccal cavity, 106; radiation technique for cancer of, with combinations of gamma radium rays and varying qualities of high voltage roentgen rays, 190; problems of malignant disease from standpoint of radiologist, 344
Muscle, Union of free fascial grafts with, 342; cause of low blood pressure produced by injury of, 523
Muzii method, New, for reduction of fractures of diaphysis of femur, 510
Mycolysates, Treatment of staphylococcus infections with bacteriophage and staphylococcus, 432
Myeloma, Solitary plasma-celled, 147; nature of Ewing's tumor, 335
Myelomeningocele of Recklinghausen, 472
Myomectomy, Statistical and comparative study of, 402
Myositis ossificans, Sarcoma developing from paravertebral traumatic, 147
Myxœdema, Endemic goiter and, 192

NAILS, Malignant tumors of bed of, 524
Nanism, Hyperhypophyseal, 381
Nanta's splenomegaly treated by splenectomy with recovery, 214
Navicular bone, Isolated fracture of tuberosity of, and os tibiale externum, 237
Neck, Hæmorrhagic cysts of, 192
Nephrectomy for tuberculosis performed on basis of Ambard's constant, 412
Nephritis, Surgical treatment of, 142
Nephrolithiasis, Importance of staphylococci in production of urinary concretions, 59; lithiasis with anuria in solitary kidney, 142
Nephrotomy without suture, 143
Nerve, Paralysis in distribution of sciatic, in connection with childbirth, 46; paralysis of oculomotor, in diabetes, 198; experiences in 600 operations on phrenic, 202; stimulation of phrenic, in diaphragmatic hernia, 215; relation of paralysis of sixth, to caries of petrous apex, 292; anatomical and physiological study of carotid, 384; cyclic or rhythmic paralysis of oculomotor, 463
Nerves, Of female genital tract, 134; paralysis of trunks of oculomotor, in diabetes, 198; experimental study of traumatic neuromata, 198; effect of resection of extrinsic and intrinsic, of stomach on development of postoperative peptic ulcer, 205; denervation of stomach for ulcer, 300; interruption of afferent system of, alone in treatment of spasmodic torticollis, 337; relation of thoracic sympathetic cardiac, to cervical sympathetic ganglionectomy, 383; diagnostic blocking of sympathetic, to extremities with procaine, 384; of cornea in man and rabbit studied by vital staining, 464; posterior spinal fusion defects and dysfunction of, of urinary tract, 502
Nervous system, Tumors of central, 109; diseases of central, in which pain is main symptom, 110; appendicitis and vegetative, 124; reaction of central, to vaccinia virus, 382; effect of, on function of genital organs, 404; importance of ophthalmology in surgery of, 472; autonomic, 473
Neuralgia, Intercostal, of abdominal wall, 299
Neurology, Contributions of otology to, 194
Neuromata, Experimental study of traumatic, 198
Neuronophagia, New data on, 384
Newborn, Prognosis of premature infants and prevention of birth trauma, 49; resuscitation of apparently dead, 49; intrathoracic and intra-abdominal hæmorrhages in, 49; rupture of liver in, after spontaneous birth, 50; intrauterine transmission of tuberculous virus by mother to child, 52; stillbirth due to intracranial injury, 226; postmortem pathology of, 226; clinical and autopsy study of, 226; otitis media and mastoiditis in infants under three months of age, 283; premature, 322; pathologico-anatomical study of fatal intracranial subdural hæmorrhages of, of non-traumatic origin, 323; chronic subdural hæmatoma in infants, 383; congenital syphilis, 409; subdural hæmorrhage associated with tentorial splitting in, 496
Nipple, Significance of sanguineous discharge from, in relation to cancer of breast, 21; Paget's disease of, 386
Nose, Bleeding from, 105; Joseph Constantine Carpue and revival of rhinoplasty, 275; nasopharyngeal fibroma, 284; problems of malignant disease from standpoint of radiologist, 344; cartilaginous and osteocartilaginous rib grafts in correction of deformities of, 466
Nucleus pulposus, Intervertebral, 506

OBESITY, Endogenous, a misconception, 76
Occupational therapy in treatment of fractures of joints, 338
Oculomotor nerve, Paralysis of, in diabetes, 198; cyclic or rhythmic paralysis of, 463
Œsophagoplasty, Antethoracic, 22
Œsophagus, Lower end of, at birth and in adult, 115; operation for carcinoma of, by endoscopic route, 115; complete surgical reconstruction of, 204; roentgen diagnosis of cancer of, 204; clinical manifestations and therapy of so-called cardiospasm, 205; angioneurotic œdema, urticaria, serum disease, and herpes of, 296; carcinoma of thoracic portion of, 297; new instrument for dilating spastic stenoses of, by controlled air pressure, 390; problems of malignant disease from standpoint of radiologist, 344; surgical management of pharyngo-œsophageal diverticulum, 466; congenital anomalies of, 476; plastic restoration of, 476
Oil, Study of halogenated, employed in roentgenology, 244; iodized, as aid in diagnosis of chronic maxillary sinus disease, 284; effect of injections of iodized, in spinal subarachnoid space, 292; advantages of Mikulicz drain soaked in gomenolized, in peritonitis, 321
Oleo-arthrosis, Treatment of articular tuberculosis by, 422
Oligohydrammios, Congenital kidney malformations and, 407
Omentum, Sarcoma of greater, 25; origin of free torsion of, 205; chronic intestinal obstruction of segmental type due to, 303; absorption and transference of particulate material by great, 391; surgical importance of, 391; chronic fever as symptom of epiploitis, 479
Operation, Individuality and resistance of surgical patients, 70; preparation of patients for, 70; effect of abdominal, on mechanism of respiration with reference to pulmonary embolism and massive collapse of lungs, 128; proper time for, in childhood, 157; pre-operative preparation and postoperative treatment including blood transfusion, 157; prevention of thrombosis and embolism after, by feeding of thyroxin, 158; importance

of vital capacity of lung in development of pulmonary complications after, 158; treatment of postoperative gastro-intestinal paresis and atony, 159; postoperative shock and shock-like conditions treated by infusion in large volume, 242; method of sterile, 431; relationship of bronchitis, atelectasis, and pneumonitis following, 474; intravenous injections of hypertonic sodium chloride solution in grave postoperative toxic and infectious states, 516; modern problems of anæsthesia with reference to postoperative complications, 518
Ophthalmia, Destructive purulent, accompanying eruptive fever with stomatitis, 464
Ophthalmology, Importance of, in surgery of nervous system, 472
Optic chiasm, Lesions of region of, 290
Orbit, Treatment of malignant tumors of, by radiation, 189; cellulitis of, in children, 377
Os tibiale externum, Isolated fracture of, 237
Osteitis, Pathogenesis of infectious, 232
Osteitis fibrosa of traumatic origin, 333
Osteochondritis deformans juvenalis, Experimental considerations in Perthes' disease, 234
Osteomalacia, Studies in, 332
Osteomyelitis, Acute hæmatogenous, of adolescence, 5; primary, of frontal bone, 13. *See also* names of bones
Osteoporosis, Painful post-traumatic, 504
Osteosynthesis, Biological and experimental contributions relative to, by Cuneo's method, 63
Otitis media, Complications of, 13; effects in later life of, in infancy, 283; and mastoiditis in infants under three months of age, 283; ear complications in scarlet fever, 283; trephination of skull at distance as method of diagnosis and treatment of intradural complications of, 470; meningeal abscesses of otitic origin, 472
Otology, Contributions of, to neurology, 194
Otosclerosis a metabolic disorder, 465
Ovary, Radiology as complete or partial substitute for surgery in treatment of cancer of female pelvic organs, 37; aggravation of tumors of, by radiotherapy, 38; actinomycosis of adnexa of female genitalia, 38; pseudomyxoma peritonæi originating in, 132; experimental studies on nerve supply of female genital tract, 134; clinical studies of non-tuberculous salpingo-oöphoritis, 217; theory of uni-ovulation mechanism and experimental investigation of follicular fluid, 219; relationship between thymus and genitalia, 250; new physiology of menstruation, 220; non-tuberculous salpingo-oöphoritis, 217; functions of cortex and medulla of thymus in relation to sexual glands, 297; torsion of normal adnexa, 315; relationship of complicated tumors in female genital organs, 316; problems of malignant disease from standpoint of radiologist, 344; effect of treatment with follicular and lutein extracts on genital tract and endocrine system, 350; pseudomucinous cystadenoma not ruptured before operation, 404; effect of nervous system on function of genital organs, 404; Krukenberg tumor in case of linitis plastica, 480; congenital absence of, and its basic significance for theory of determination of sex, 491; effects produced on, by graded doses of follicular fluid, extract of corpus luteum, and extract of whole gland, 492
Ovulation, Time of, in menstrual cycle as checked by recovery of ova from fallopian tubes, 134; theory of mechanism of, 219

PAGET'S disease of nipple, 386
Pain, Diseases of central nervous system in which, is main symptom, 110; relation of facial, to caries of petrous apex, 292; localization of abdominal, 400
Palate, Mixed tumors in soft, 107; repair of cleft, after unsuccessful operations, 284; problems of malignant disease from standpoint of radiologist, 344; harelip and cleft, 466
Pancreas, Influence of thyroxin on external secretion of, and on fermentative properties of secretion, 16; influence of lumbar sympathectomies and ablation of stellate ganglion of sympathetic on regulation of blood sugar by, 35; experimental study of islet cells of, *in vivo*, 126; reflux of secretion of, through drainage tube in common bile duct, 212; pancreatic bladder in domestic cat, 213; cause of death following total loss of pancreatic juice, 213; effect of isolation of tail of, on carbohydrate metabolism, 312; presence of ganglion cells in islands of Langerhans, 399; function of, 487; secretory mechanism of digestive juices, 487
Paralysis, In distribution of sciatic nerve in connection with childbirth, 46; complete paraplegia with recovery, 198; of oculomotor nerve trunks in diabetes, 198; relation of, of sixth nerve to caries of petrous apex, 292; reconstructive surgery in deformities of leg due to, 337; bony fixation of foot in infantile, 425; cyclic or rhythmic oculomotor, 463; postural treatment of infantile, 505
Parathyroid glands, End-results of treatment of ankylosing polyarthritis by extirpation of, 63
Parinaud's syndrome after spinal anæsthesia, 72
Patella, Fractures of, and their sequelæ, 153; proliferation of subpatellar fatty tissue of traumatic origin, 507
Pelvis, Functional diagnosis of too narrow, by registration of labor pains, 139; transcervical drainage in purulent infections of, requiring supravaginal hysterectomy, 222; necrosis of ileum following inflammatory disease in, 305; influence of inflammation of appendix on organs of, 396; limitations and methods of increasing accuracy of roentgenological measurement of, by exposures in sitting posture, 408
Penis, Radiotherapy of cancer of, 230; pathology and treatment of carcinoma of, 328; therapeutic indications in cancer of, 499
Percaine, Use of, for regional and spinal analgesia, 342
Periarterial sympathectomy, *See* Sympathectomy
Periduodenitis, 482
Peritoneum, Pseudomyxoma of, 24; of bladder, 54; importance of anaërobic bacilli as agents of infection of abdominal organs, 127; pseudomyxoma of, of ovarian origin, 132; free implantation of endometrium on, of guinea pigs, 134; roentgen diagnosis of hydatid infection, 246; peritoneal syndromes in acute articular rheumatism, 478
Peritonitis, True, in children, 117; treatment of abdominal tuberculosis in female, 221; intra-abdominal postoperative complications of appendicitis, 307; subhepatic perivisceritis, 313; acute puerperal, cured by operation performed at about forty-eighth hour, 321; advantages of Mikulicz drain soaked in gomenolized oil, in, 321; tuberculous, 478
Perivisceritis, Subhepatic, 313
Perthes' disease, *See* Osteochondritis deformans juvenalis
Phagocytes, Simultaneous ingestion of two dyestuffs by, 341
Pharynx, Fibroma of, 284; surgical management of pharyngo-œsophageal diverticulum, 466
Phimosis, Proper time for operations in childhood, 157
Phlebitis, Pathogenesis of, 239
Phlegmasia alba dolens, Mortality from, in Holland, 224
Phosphaturia, 231
Phrenic nerve, Experiences in 600 operations on, 202; stimulation of, in diaphragmatic hernia, 215

Phrenicectomy, In treatment of pulmonary diseases, 21; surgical treatment of pulmonary tuberculosis at Thirty-Eighth French Congress of Surgery, 201; experiences in 600 operations on phrenic nerve, 202; in apical and subapical tuberculosis, 294; as treatment of diaphragmatic hernia, 313
Physiological salt solution, Continuous intravenous administration of, 242; postoperative shock and shock-like conditions treated with, 242
Pia mater, Calcifications of, of angiomatous origin demonstrated by roentgenography, 19
Pituitary gland, *See* Hypophysis
Placenta, Separation of kyogenic hormone from human, 45; biology and physiology of, 136; rôle of, in carbohydrate metabolism of fetus, 136; intervillous space of, 136, 137; pathology of tumors of, 223; management of retroplacental hæmorrhage, 318; reactive neoformations resulting from anatomical and functional insufficiency of human, 407
Placenta prævia, Place of low cæsarean section in treatment of hæmorrhage due to, 321
Placentitis, Pathogenesis of, 318
Plasmocytoma of intestine, 30
Pleura, Corticopleural affections occurring exclusively in infants, 475
Pleurisy, Roentgen demonstration of, in children, 113
Pneumonitis, Relation of postoperative, to postoperative bronchitis and atelectasis, 474
Pneumonotomy, Gangrenous abscess of lung treated by, 388
Pneumoperitoneum, Development of, during artificial pneumothorax, 214
Pneumothorax, Collapse therapy for pulmonary tuberculosis in pregnant women, 138; experiences in 600 phrenic nerve operations, 202; pneumoperitoneum in course of artificial, 214; spontaneous simple, 296; spontaneous, following bronchoscopic aspiration of pulmonary abscess, 388
Polycythæmia, Perirenal hæmatoma primary with, 411
Polyuria, Experimental, 415
Portal vein, Sympathectomy of, in relation to glycogenic function and histological changes in liver, 310
Postural treatment of infantile paralysis, 505
Potassium, Value of, in radiobiology, 521
Pregnancy, Pathological elevation of diaphragm in, 42; cardiopathies and, 42; tuberculosis and, 42, 318; hæmorrhagic encephalitis following salvarsan treatment during, 44; obstetrical management of cases of urinary infections in, 44; pyuria gravidarum febrilis, 48; antenatal, natal, and postnatal problems, 50; hydrogen-ion concentration of urine before, during, and after labor following normal, and in toxicoses, 51; intra-uterine transmission of tuberculous virus by mother to child, 52; clarification of objections to diagnosis of early, on basis of antithrombin determinations, 67; clinical aspects of pyelonephritis in, 137; clinical course and treatment of necrotic interstitial myomata during, 138; collapse therapy for pulmonary tuberculosis in, 138; diagnosis and management of ruptured extra-uterine, 318; cataclysm in ruptured ectopic, not result of hæmorrhage, 318; management of retroplacental hæmorrhage, 318; determinations of pulse volume and respiratory metabolism during, 407; after splenectomy, 487
Premature infants, Prognosis of, 49; report on, 322
Prespondylolisthesis, 509
Procaine, Diagnostic blocking of sympathetic nerves to extremities with, as test to evaluate benefit of sympathetic ganglionectomy, 384
Prostate, Retention of urine, 58; obstructive lesions of, 57; influence of cautery punch operation in decreasing necessity for prostatectomy, 57; origin and extension of cancer of, 145; carcinoma of, in childhood, 230; diffuse osteoplastic carcinoma of skeleton from clinically unrecognized primary carcinoma of, 230; embryology, anatomy, and surgery of, 329; as focus of infection in arthritis, 329; problems of malignant disease from standpoint of radiologist, 344; kidney and ureteral lesions secondary to adnexal disease, 498; enlarged, and prostatectomy, 500, 501
Prostatectomy, Influence of cautery punch operation in decreasing necessity for, 57; tamponade following, 146; enlargement of prostate and, 500, 501; factors that have contributed to improvement in results of, 501
Pseudomucinous cystadenoma in which cysts were not ruptured before operation, 404
Psychosis, Diagnosis and treatment of milder forms of manic-depressive, 382
Ptosis, Congenital, and its treatment, 463
Pubic bone, Differential diagnosis of tuberculosis of, in female and paths by which abscess spreads, 60
Puerperium, Causes of death in, 47; cessation of coagulation of blood in postpartum hæmorrhage, 48; simple acute endocarditis in puerperal infection, 48; antenatal, natal, and postnatal problems, 50; hydrogen-ion concentration of urine before, during, and after labor following normal pregnancy and in toxicoses, 51; pyelitis in 140; maternal mortality, 140; thrombophlebitis in, 224; phlegmasia alba dolens, embolism, and sudden death in, in Holland, 224; treatment of puerperal sepsis in light of bacteriological research, 225; acute peritonitis in, cured by operation at about forty-eighth hour and use of Mikulicz drain soaked in gomenolized oil, 321; treatment of acute puerperal inversion, 495; nature and sources of infection in, 495; infection by anaërobic streptococci in puerperal fever, 495
Pulse, Determinations of, and respiratory metabolism during pregnancy, 407
Pupil, Variations in refraction of visual and extravisual pupillary zones, 104
Purpura, Intussusception complicating visceral (Henock's), 393; resection of intestinal loop for lesion occurring in course of hæmogenic, 512
Pus, Origin of suppurative perforation, 160
Pyelitis, Obstetrical management of urinary infections in pregnancy, 44; in puerperium, 140
Pyelography, Intravenous, 324, 497; localization of tuberculous kidney by endovenous, 324; intravenous, as test of renal function, 497
Pyelonephritis, Clinical aspects of, in pregnancy, 137
Pyelonephrosis, Obstetrical management of urinary infections in pregnancy, 44
Pylephlebitis, Intra-abdominal postoperative complications of appendicitis, 307
Pyuria gravidarum febrilis, 48

RADIOBIOLOGY, Importance of potassium in, and radiotherapy, 521
Radium, Treatment of epithelioma of tongue with, 14; radiology as complete or partial substitute for surgery in cancer of female pelvic organs, 37; factors determining radioresistance in tumors, 74; rational method of procedure in irradiation of malignant tumors, 75; treatment of carcinoma of breast with, 112; importance of study of bacterial flora in epithelioma of cervix in irradiation therapy, 130; unusual late sequelæ of treatment with, 131; combination of irradiation and Wertheim operation with ligation of internal iliac arteries in carcinoma of cervix, 132; treatment of malignant tumors of eye and orbit by radiation, 189;

radiation technique for cancer of mouth with combinations of gamma rays of, and varying qualities of high voltage roentgen rays, 190; technique in management of new growths of bladder, 229; radiotherapy of cancer of penis, 230, 328; calculations of tissue dosage in radiation therapy, 244; present status of treatment of cancer of larynx, 288; treatment of carcinoma of rectum with, 309; glandular recurrence of carcinoma of cervix cured by, 315; treatment of mammary carcinoma by radiation, 386; position of, in treatment of gynecological conditions, 405; radiotherapy of malignant tumors in Sweden, 435; experimental production of gastric ulcer with, 480; therapeutic indications in cancer of penis, 499; cause of death from, 521

Radius, Congenital radio-ulnar synostosis, 233

Raynaud's disease, Thoracic and lumbar sympathetic ganglionectomy in peripheral vascular diseases, 110

Rectum, Treatment of rectovaginal fistulæ, 40, treatment of prolapse of, 125; sacral extirpations of, for carcinoma, 125; unusual late sequelæ of radium therapy, 131; anæsthesia in surgery of, 160; abdominoperineal amputation of, with routine lowering to perineum, 210; surgical treatment of carcinoma of, and its late results, 210; adenomatous polyps of colon and, 305; solid teratoma, fibroleiomyoma, paraffinoma, and chordoblastoma of, 308; treatment of carcinoma of, with radium, 309; subacute invagination of sigmoid colon into, due to sigmoid cancer, 397; intrarectal roentgenography, 521

Resistance of surgical patients, 70

Respiration, Effect of abdominal operations on mechanism of, 128

Respiratory metabolism, Determinations of, during pregnancy, 407

Reticulo-endothelial system, Streptococcus sepsis and, 69; under influence of roentgen ray and its relations to roentgen intoxication, 74; effect of moist heat on healing by first intention and on reaction of, 159; blockade of, 341; importance of considering liver excretion in study of blockade of, 437

Retina, Angiospasm of, in relation to arteriolar disease, 283; traumatic rupture of choroid with detachment and spontaneous re-attachment of, 379

Retinitis, Classification of, 283

Rheumatism, Peritoneal syndromes in acute type of articular, 478

Rhinoplasty, Joseph Constantine Carpue and revival of, 275

Rickets, Changes suggesting, produced by strontium, 150; pseudo, 332

Roentgen-ray diagnosis, Of calcifications of pia mater of brain of angiomatous origin, 19; of duodenojejunal diverticula and mucocele of appendix and cæcum, 31; of lesions of jejunum and ileum, 32; contraction of gall bladder photographed, 34; cystography in infancy and childhood, 54; of lesions of head of humerus, 64; of empyema, 113; of pleurisy in children, 113; of postoperative biliary fistulæ, 126; of renocæcal fistula, 143; of luxations in region of foot, 153; of cancer of œsophagus, 204; of prolapse of pedunculated tumors and gastric mucosa through pylorus and duodenum, 206; perforation of fallopian tube in intra-uterine injection of lipiodol in salpingitis, 219; halogenated oils employed in roentgenology, 244; difficulties and fallacies in, of hydatid infection, 246; iodized oil as aid in diagnosis of maxillary sinus disease, 284; effect of injections of iodized oil in spinal subarachnoid space, 292; intravenous pyelography, 324, 497; excretion urography, 330; of tumors of pituitary gland, 383; limitations and methods of increasing accuracy of roentgenological measurement of pelvis by exposures in sitting posture, 408; localization of tuberculous kidney by endovenous pyelography, 412; of disorders of motor function in gynecology, 493; intravenous pyelography as test of function of kidneys, 497; intracavitary roentgenography, 521; intrarectal and intragastric roentgenography, 521

Roentgen-ray treatment, Of myomata, 37; aggravation of ovarian tumors by, 38; reticulo-endothelial system under influence of, and its relations to roentgen intoxication, 74; factors determining radioresistance in tumors, 74; of malignant tumors, 75; late injury after, 75; dosage of hard roentgen rays with long focus-skin distance in, of carcinoma of cervix, 130; combination of irradiation and Wertheim operation with ligation of internal iliac arteries in carcinoma of cervix, 132; of malignant tumors of eye and orbit, 189; of cancer of mouth with combinations of gamma radium rays and varying qualities of high voltage roentgen rays, 190; of sarcoma of uterus, 217; calculations of tissue dosage in, 244; macroscopic and skin capillary changes after combined exposure to roentgen rays and ultraviolet rays, 244; study of roentgen-ray erythema by capillaroscopy, 244; in inflammatory conditions, 245, 434; of xanthomatosis, 334; problems in treatment of malignant disease from standpoint of radiologist, 344; of malignant tumors in Sweden, 435; in hæmopathy, 514; value of potassium in radiobiology, 521

Round ligament, Tumors of, 220

SALPINGITIS, Operative results in 1,066 cases of, 316; pseudotuberculous, 404; diagnosis of tuberculous, by Besredka's reaction, 490

Salpingo-oöphoritis, Clinical studies of, not due to tuberculosis, 217

Salt solution, Continuous intravenous administration of physiological, 242; infusion of, in treatment of postoperative shock, 242; intravenous injections of hypertonic, in grave postoperative toxic and infectious states, 516

Salvarsan, Hæmorrhagic encephalitis following treatment with, during pregnancy, 44

Saphenous vein, Ambulatory ligation of, 340

Sarcoma, Spontaneous inoculation of melanotic, from mother to fetus, 249; problems of malignant disease from standpoint of radiologist, 344; spontaneous tumors of rat, 347; diagnosis and treatment of tumors of long bones, 418

Scarlet fever, Ear complications in, 283

Scarlet fever antitoxin, Hæmolytic streptococcus gangrene following administration of, 163

Sciatic nerve, Paralysis in distribution of, in connection with childbirth, 46

Sclerosis, Etiology of disseminated, 195; specific vaccine treatment in disseminated, 196; pathological and biochemical changes produced by "virus" cultivated from cerebrospinal fluid in, 197

Sella turcica, Chiasmal syndrome of primary optic atrophy and bitemporal field defects in adults with normal, 470; diagnosis and treatment of suprasellar tumors, 471

Semen, Technique of study of cytology of, 329

Seminal vesicle, Leiomyomata of malformed, and vas deferens, 231; kidney and ureteral lesions secondary to adnexal disease, 498

Semmelweis, Hegar's accomplishments in spirit of, 222

Sepsis, Streptococcus, and reticulo-endothelial system, 69; treatment of puerperal, in light of bacteriological research, 225; unusual form of, 249; nature and sources of infection in puerperal, 495

Septicæmia, Simple acute endocarditis in puerperal infection, 48; treatment of puerperal sepsis in light of bacteriological research, 225; chronic meningococcus, 348; infection by anaërobic streptococci in puerperal fever, 495; nature and sources of infection in puerperal sepsis, 495; due to bacillus pyocyaneus, 524
Serum, Treatment of gas gangrene with normal horse, 242
Sex, Significance of congenital absence of ovaries for theory of determination of, 491
Shock, Postoperative, treated by infusion in large volume, 242; cause of low blood pressure in, produced by muscle injury, 523
Shock bleeding due to cessation of coagulation of blood in postpartum hæmorrhage, 48
Shoulder, Recurrent dislocation of, treated by procedures of Louis Bazy and Oudard, 64; results of treatment of tuberculosis of, 148; arthrodesis of, by means of osteoperiosteal grafts, 235
Sigmoid, Tuberculosis of, simulating primary malignant lesion, 33; treatment of diverticulitis of, 33; primary sarcoma of, 209; subacute invagination of, into rectum due to cancer of, 397
Sigmoid flexure, Pathological torsion of, 209
Sigmoiditis, Treatment of, with diverticulitis, 33; results of surgical treatment of, 124
Sinus, Generalized epilepsy of essential type in case of ampullar dilatation of superior longitudinal, 18; plastic closure of openings between antrum and buccal cavity, 106; surgical treatment of inflammation of frontal, and its complications, 189; iodized oil as aid in diagnosis of chronic disease of maxillary, 284; radical operation on maxillary, 466; conservative treatment of chronic maxillary sinusitis, 466
Sinusitis, Conservative treatment of chronic maxillary, 466
Skin, Roentgen erythema of human, 244; macroscopic and capillary changes in, after combined exposure to roentgen rays and ultraviolet rays, 244; problems of malignant disease from standpoint of radiologist, 344; invasion of epidermis by carcinoma, 348; staphylococcal infections of, 516
Skull, Injuries to head, 18; tuberculosis of, 377; effects of depressed fractures of, 469; trephination of, at distance as method of diagnosis and treatment of intradural complications of otic origin, 470
Sodium amytal, Experimental anæsthesia with, 343
Spina bifida, "Cystic," 472; posterior spinal fusion defects and nerve dysfunction of urinary tract, 502
Spinal cord, Spondylitis deformans with medullary symptoms, 60; tumors of central nervous system, 109; cauda equina syndrome due to fibrosarcoma of dura mater, 109; diseases of central nervous system in which pain is main symptom, 110; complete paraplagia with recovery, 198; interruption of afferent system alone in treatment of spasmodic torticollis, 337; reaction of central nervous system to vaccinia virus, 382; tumors of, 383; cerebrospinal metastases from unsuspected pulmonary carcinoma, 389; posterior spinal fusion defects and nerve dysfunction of urinary tract, 502
Spine, Spondylitis deformans with medullary symptoms, 60; sarcoma developing from paravertebral traumatic myositis ossificans, 147; erosion of vertebræ by aneurism, 147; results of treatment of tuberculosis of, 148; fracture of odontoid process of axis with anterior luxation of atlas without cord symptoms, 151; nature of Kuemmell's disease, 233; effect of injections of iodized oil into subarachnoid space of, 292; fractures of, with and without operation, 339; metastases in, in case of cerebral glioma of type known as astrocytoma fibrillare, 383; metastases in, from unsuspected pulmonary carcinoma, 389; influence of inflammation of appendix on, 396; chondroma of intervertebral disk, 420; treatment of disabilities resulting from low back derangements, 423; surgery of, 424; posterior fusion defects of, and nerve dysfunction of urinary tract, 502; intervertebral nucleus pulposus, 506; primary acute and subacute purulent osteomyelitis of vertebræ, 506; spondylolisthesis, traumatic subtotal or total luxation in lumbosacral region, and so-called prespondylolisthesis, 509
Spinocaine, Use of controllable spinal anæsthesia induced with, in major operations, 432; for controllable spinal anæsthesia, 433; for spinal analgesia, 433
Spleen, Intra-abdominal hæmorrhages in newborn, 49; hæmorrhagic cysts of, 127; ruptures of, associated with rupture of kidney, 213
Splenectomy, Nanta's splenomegaly treated by, with recovery, 214; pregnancy following, 487
Splenomegaly, With chronic congestion and Gamna's nodules in case of florid hereditary syphilis, 35; Nanta's, treated by splenectomy with recovery, 214
Spondylitis deformans with medullary symptoms, 60
Spondylolisthesis, 509, 510
Staphylococci, Importance of, for production of urinary concretions, 59; infections of skin due to, 516
Staphylococcus mycolysates, Treatment of staphylococcus infections with bacteriophage and, 432
Sterility, Results obtained in treatment of, 40; in woman, 316; syphilitic, 405
Sterilization, Late results of simple abortion and abortion with tubal, in women with pulmonary tuberculosis, 45
Stillbirth due to intracranial injury, 226
Stomach, Diagnostic and therapeutic errors in field of digestive diseases and their prevention, 25; unusual tumors of gastro-intestinal tract, 26; basal metabolism in cancer of digestive tract, 27; regulation of reaction of blood in diseases of, 27; functional condition of pyloric part of small pyloric, isolated by Pawlow's method, 27; experimental chronic ulcers of, produced by deviation of alkaline duodenal juices, 28; surgically treated case of ulcer stenosis in child two years old, 28; treatment of perforated peptic ulcer, 28; technique and results of gastro-enterostomy and of resection of, by Tansini's method, 29; operation for failures of operation for ulcer of, and chronic gastritis, 118; recurrent ulcer and gastritis in surgically treated, 118; silent perforation of ulcer of, with free gas and fluid in abdominal cavity without clinical signs, 119; pathogenesis and treatment of gastro-enterocolic fistulæ, 120; protection of gastro-intestinal sutures by drains and gauze strips, 120; importance of anaërobic bacilli as agents of infection of abdominal organs, 127; proper time for operations in childhood, 157; postoperative gastro-intestinal paresis and atony, 159; effect of resection of extrinsic and intrinsic nerves of, on development of postoperative peptic ulcer, 205; reflections on failures after resection for ulcer of, 206; roentgenological diagnosis of prolapse of pedunculated tumors and mucosa of, through pylorus and duodenum, 206; volvulus of, 299; syphilis of, 299; relation of Brunner's glands to genesis of gastroduodenal ulcer, 299; serological and etiological specificity of alpha streptococcus of ulcer of, 300; anaphylaxis and ulcer of, 300; denervation of, for ulcer, 300; relation of medicine to surgery in treatment of ulcer of, 301; pylorogastric resection for perforated ulcer and cancer of, 302; problems of malignant disease from standpoint of radiologist, 344; acute perforation of, 392; cause of sudden pain in perforation of ulcer of, 392; operative results in partial and subtotal gastrectomy for gastroduodenal ulcers, 393; duodenitis, duodenal ulcer, and ulcer of, 395; hydrogen-ion concentration of urine and secretion of hydrochloric acid in, 415;

biliary and hepatic factors in peptic ulcers, 479; experimental production of ulcer of, with radium emanation, 480; physiological and chemical studies following successful total gastrectomy for carcinoma of, 480; sarcoma of, 481; intragastric roentgenography, 521
Stomatitis, Destructive purulent ophthalmia accompanying eruptive fever with, 464
Streptococci, Sepsis due to, and reticulo-endothelial system, 69; serological and etiological specificity of alpha, of gastric ulcer, 300; infection by anaërobic, in puerperal fever, 495
Strontium, Experimental detachment of epiphysis and rachitiform changes produced by, 150
Sublingual gland, Mixed tumors of, 107
Subpectoral abscesses, Treatment of, 23
Subphrenic abscess, Intra-abdominal postoperative complications of appendicitis, 307
Sugar, Influence of lumbar sympathectomies and ablation of stellate ganglion of sympathetic on regulation of, in blood, by pancreas, 35; fluctuations of, in blood during eclampsia, 44; tumor of adrenal gland with fatal hypoglycæmia, 497
Suprarenal, Intra-abdominal hæmorrhages in newborn, 49; acute generalized cancer of septicæmic form arising in cortex of, 411; tumor of adrenal gland with fatal hypoglycæmia, 497; incidence of atrophy and tuberculosis of adrenal glands and their relation to Addison's disease, 497; atrophy of adrenals associated with Addison's disease, 497
Surgery of Century 1830–1930, 1
Sutures, Protection of gastro-intestinal, by drains and gauze strips, 120; use of fresh strips of aponeurosis as, 342
Sympathectomy, Late result of unilateral lumbar, 19; influence of lumbar and ablation of stellate ganglion of sympathetic on regulation of blood sugar by pancreas, 35; thoracic and lumbar sympathetic ganglionectomy in peripheral vascular diseases, 110; periureteral, 228; of portal vein in relation to glycogenic function and histological changes in liver, 310; relation of thoracic sympathetic cardiac nerves in man to cervical sympathetic ganglionectomy, 383; diagnostic blocking of sympathetic nerves to extremities with procaine for evaluation of benefit of sympathetic ganglionectomy, 384
Synovia, Physiopathology of joint cavities in relation to, 232
Syphilis, Splenomegaly with chronic congestion and Gamna's nodules in florid hereditary, 35; hæmorrhagic encephalitis following salvarsan treatment during pregnancy, 44; after blood transfusion, 156; gumma of brain, 291; of stomach, 299; bismuth in treatment of, 350; sterility due to, 405; congenital, 409
Syringomyelia, Study of skeleton in, 333

TABES, Study of skeleton in, 333
Talocrural joint, Surgical treatment of osteochondritis dissecans in, 62
Teeth, Advisability of extraction of, during stage of acute infection, 191
Temporal bone, Relation of localized bulbar cisterna meningitis, facial pain, and sixth nerve paralysis to caries of petrous apex, 292
Tendon of Achilles, Ruptures of, 421
Tendon sheaths, Hæmangioma of, 233
Tendons, Hæmangioma of, 233; rupture of, 336; study of insertions of extensor, of hand, 336
Testicle, Embryonal carcinoma of, 57; malignant neoplasms of, 58; proper time for operations in childhood, 157; re-activation of senile, of rat by injections of gonadotrope hormones, 330; clinical and anatomico-pathological study of seminoma of undescended, 414; evolution of grafts of, of goat and ram, 414; pathogenesis and etiology of cystic formations of, 502
Thigh, Bullet wound of, causing aneurism of femoral artery in Scarpa's triangle, 239
Thorax, *See* Chest
Thoracoplasty, During treatment of pulmonary tuberculosis, 22; fundamental principles of, for production of mechanical effect on work of enlarged heart, 114; surgical treatment of pulmonary tuberculosis at Thirty-Eighth French Congress of Surgery, 201; extrapleural, 387
Thrombo-angiitis obliterans, 428; syndrome of arterial obliteration suggesting, in lower extremities observed for nine years, 66; thoracic and lumbar sympathetic ganglionectomy in peripheral vascular diseases, 110; gangrene of extremities, 246; ligation of both femoral artery and vein in, 340
Thrombophlebitis, Puerperal, 224
Thrombosis, Otitic complications, 13; resection of 594 cm. of small bowel for acute, of superior mesenteric vein, 31; origin and prophylaxis of, 70; and embolism, 71; cure of, of superior mesenteric vein by resection of entire small intestine, 118; effect of abdominal operations with reference to pulmonary, 128; of abdominal aorta, 155; reaction of vascular endothelium as basis of, 155; pre-operative preparation and postoperative treatment, 157; prevention of postoperative, by feeding of thyroxin, 158; mortality from, and embolism in Holland, 224; suture of inferior vena cava and Trendelenburg operation on same patient, 430
Thymophysin in obstetrics, 320
Thymus, Relationship between, and genitalia, 250; functions of cortex and medulla of, in relation to sexual glands, 297
Thyroid, Gross and microscopic structure of, in man, 14; demonstration of hormone of, in blood and urine of hyperthyroidized dogs, 16; fatal case of exophthalmic goiter commencing during administration of, 107; relation of recurring exophthalmic goiter to amount of tissue preserved in operation on, 467; total necrosis of half goiter after ligation of both main arteries, 467
Thyroxin, Influence of, on external secretion of pancreas and fermentative properties of secretion, 16; prevention of postoperative thromboses and embolisms by feeding of, 158; control of avertin anæsthesia with, 243
Tibia, Fractures of spine of, 237; diagnosis and treatment of tumors of long bones, 418
Tongue, Treatment of epithelioma of, with radium, 14; mixed tumors of, and sublingual gland, 107; problems of malignant disease from standpoint of radiologist, 344
Tonsil, Lingual, 14; problems of malignant disease from standpoint of radiologist, 344
Tonsillectomy, Bronchoscopic considerations of, 14, 285; laryngological aspect of pulmonary abscess following, 14; medical aspects of pulmonary abscess following, 285; factors in healing of pulmonary abscess following, 285
Torticollis, Spasmodic, treated by interruption of afferent system alone, 337
Torula infections in man, 525
Transfusion, *See* Blood transfusion
Trendelenburg operation, Suture of inferior vena cava and, on same patient, 430
Tuberculin, Treatment of ocular tuberculosis with, 282
Tuberculosis, And pregnancy, 42, 318; intra-uterine transmission of tuberculous virus by mother to child, 52; blood examination and surgical, 505. *See also* names of organs

Tumors, Unusual, of gastro-intestinal tract, 26; factors determining radioresistance of, 74; rational method of procedure in irradiation of malignant, 75; connective tissue, of limbs, 248; spontaneous, of rat, 347; diagnosis of, of long bones, 418; recurrent and so-called metastatic giant-cell, 419; radiotherapy of malignant, in Sweden, 435. *See also* names of tumors and organs
Typhoid perforation operated upon after eighteen hours, 304

ULCER, Treatment of varicose, 428. *See also* names of organs
Ulna, Congenital radio-ulnar synostosis, 233; habitual luxation of lower joint of, 509
Ultraviolet light, Macroscopic and skin capillary changes after combined exposure to roentgen rays and, 244
Umbilical cord, Length of, 51
Urea, Nephrectomy for tuberculosis performed on basis of Ambard's constant, 412
Ureter, Ureteropyelonephrostomy for urinary obstruction at ureteropelvic junction, 53; primary carcinoma of, 144; periureteral sympathectomy, 228; ectopia of, 228; operative injury of, 326; calculus of, 327; urinary calculi in infancy and childhood, 416; lesions of, secondary to adnexal disease, 498
Ureteropyelonephrostomy for urinary obstruction at ureteropelvic junction, 53
Ureterovesical valve, Function of, and experimental production of hydro-ureters without obstruction, 144
Urethra, Diagnosis of rarer types of obstructive lesions in male, 56; traumatic rupture of bladder and, 327; preliminary drainage in stricture of, 328; azotæmia in stricture of, 413; caruncle of, in female, 499
Urinary tract, Obstetrical management of infections of, in pregnancy, 44; importance of staphylococci for production of concretions in, 59; cystin calculi, 229; excretion urography, 330; bacteriophage in infections of, 331; calculi of, in infancy and childhood, 416; posterior spinal fusion defects and dysfunction of nerves of, 502
Urine, Demonstration of thyroid hormone in, of hyperthyroidized dogs, 16; hydrogen-ion concentration of, before, during, and after labor following normal pregnancy and in toxicoses, 51; retention of, 58; effect of stagnation of, on localization in kidney of bacteria circulating in blood, 324; hydrogen-ion concentration of, and secretion of hydrochloric acid in stomach, 415
Urography, Excretion, 330
Uterus, Symptoms of myomata of, during menopause, 37; bacterial flora of fibromyomatous, 37; principles in treatment of myomata, 37; radiology as complete or partial substitute for surgery in treatment of cancer of female pelvic organs, 37; manipulations for exteriorization of, in conservative operations performed by colpotomy, 38; intra-uterine transmission of tuberculous virus by mother to child, 52; importance of anaërobic bacilli as agents of infection of abdominal organs, 127; importance of bacterial flora in epithelioma of cervix in irradiation therapy, 130; dosage of hard roentgen rays with long focus-skin distance in treatment of carcinoma of cervix, 130; unusual late sequelæ of radium therapy of, 131; surgical treatment of carcinoma of cervix, 131; combination of irradiation and Wertheim operation with ligation of internal iliac arteries in treatment of carcinoma of cervix, 132; nerve supply of female genital tract, 134; clinical course and treatment of necrotic interstitial myomata during pregnancy, 138; chronic infection of cervix, 216; simplification of operation for myoma which establishes early operative indications, 216; transition to malignancy in benign lesions of mucosa of, 216; basic cause and nature of cancer of, 217; pathology of erosion of cervix and the relation between cervicitis and cervical cancer, 217; sarcoma of, and roentgen therapy, 217; intra-uterine injection of lipiodol in case of unrecognized tubal perforation, 219; transcervical drainage in purulent infections of pelvis requiring supravaginal hysterectomy, 222; difficulties and fallacies in roentgen diagnosis of hydatid infection, 246; the new physiology of menstruation and its practical implications in obstetrics and gynecology, 220; relationship between thymus and genitalia, 250; acute sacculation of, 315; carcinoma of female genital tract in childhood, 315; glandular recurrence of carcinoma of cervix cured by radium puncture at laparotomy, 315; relationship of various kinds of tumors complicated in female genital organs, 316; management of retroplacental hæmorrhage, 318; physiology of, in labor, 319; problems of malignant disease from standpoint of radiologist, 344; procedure to be followed in perforation of, 401; connective tissue lesions of collagenic framework of endometrium in functional menorrhagia and metrorrhagia, 401; chronic cervicitis and precancerous conditions of cervix, 403; end-results in hydatidiform mole treated by curettage, 403; sarcoma of, 403; effect of nervous system on function of genital organs, 404; part played by intra-uterine injections in gynecology, 405; position of radium in treatment of gynecological conditions, 405; extemporaneous evacuations of, at end of pregnancy at Montpellier Maternity Hospital, 408; urgent hæmorrhage from, of constitutional origin, 489; myoma of portio vaginalis, 489; hæmangioma of, 489; mixed tumor of body of, 489; cancer of cervical stump after supravaginal hysterectomy, 490; clinical and roentgenological studies of disorders of motor function in gynecology, 493; effect of spinal anæsthesia on contractions of, 494; fistula from, to abdominal wall following cæsarean section treated surgically, 495; treatment of acute puerperal inversion of, 495

VACCINATION, Encephalitis following, in man, 382
Vaccines, Specific, in disseminated sclerosis, 196
Vaccinia virus, Reaction of central nervous system to, 382
Vagina, Radiology as complete or partial substitute for surgery in treatment of female pelvic organs, 37; formed artificially, 39; aplasia of, operated upon by Schubert technique, 39; plastic operations on, 39; treatment of rectovaginal fistulæ, 40; unusual late sequelæ of radium therapy, 131; spontaneous disinfection of, 132
Varicose ulcer, Treatment of, 428
Varicose veins, Ambulatory ligation of saphenous vein in treatment of, 340
Vas deferens, Leiomyomata of, 231
Vein, Resection of 594 cm. of small bowel because of acute thrombosis of superior mesenteric, 31; cure of thrombosis of superior mesenteric, by resection of entire small intestine, 118; sympathectomy of portal, in relation to glycogenic function and histological changes in liver, 310; ambulatory ligation of saphenous, 340; ligation of both femoral artery and, in thrombo-angiitis obliterans, 340
Veins, Arterial obliterations originating in, 239
Vena cava, Suture of interior, and Trendelenburg operation on same patient, 430; origin of indirect traumatic tears of, 430
Vertebræ, *See* Spine
Vertigo, Surgical treatment of labyrinthine, by évidement of semicircular canals, 379
Visual field, Interpretation of defects in, 104; importance of, as aid in localization of brain tumors, 291; concen-

tric contraction of, 378; chiasmal syndrome of primary optic atrophy and bitemporal defects of, in adults with normal sella turcica, 470
Vital staining, Studies on, with regard to simultaneous ingestion of two dyestuffs by phagocytes, 341; studies on, with India ink and brilliant vital red with regard to importance of considering liver excretion in study of blockade of reticulo-endothelial system, 437; studies on, with brilliant vital red and niagara sky blue with regard to correlation of histological with physiological data, 437; experimental and clinical observations on nerves of cornea in man and rabbit by means of, 464
Vitreous, Relations between physicochemical properties of, and intra-ocular tonus, 378
Vulva, Treatment of carcinoma of, 133

WERTHEIM operation, Combination of irradiation and, with ligation of internal iliac arteries in carcinoma of cervix, 132
Wounds, Bacterial content and treatment of accidental, 159
Wrist, Habitual luxation of lower ulnar joint, 509

X-RAY, *See* Roentgen ray
Xanthomatosis treated with roentgen rays, 334

BIBLIOGRAPHY INDEX

Surgery of the Head and Neck

Head, 78, 165, 251, 352, 438, 526
Eye, 78, 165, 251, 352, 438, 526
Ear, 78, 166, 252, 353, 439, 527
Nose and Sinuses, 79, 166, 252, 353, 439, 527
Mouth, 79, 167, 252, 354, 439, 528
Pharynx, 79, 167, 253, 354, 440, 528
Neck, 80, 167, 253, 355, 440, 528

Surgery of the Nervous System

Brain and Its Coverings; Cranial Nerves, 80, 168, 254, 355, 440, 529
Spinal Cord and Its Coverings, 81, 168, 255, 356, 442, 530
Peripheral Nerves, 169, 255, 356, 442, 530
Sympathetic Nerves, 81, 169, 255, 357, 442, 531
Miscellaneous, 81, 169, 255, 357, 442, 531

Surgery of the Chest

Chest Wall and Breast, 82, 169, 255, 357, 442, 531
Trachea, Lungs, and Pleura, 82, 169, 255, 357, 443, 531
Heart and Pericardium, 83, 170, 256, 358, 443, 532
Œsophagus and Mediastinum, 83, 170, 256, 358, 444, 532
Miscellaneous, 83, 256, 358, 444, 532

Surgery of the Abdomen

Abdominal Wall and Peritoneum, 83, 170, 256, 358, 444, 532
Gastro-Intestinal Tract, 84, 171, 257, 359, 444, 533
Liver, Gall Bladder, Pancreas, and Spleen, 86, 173, 259, 361, 447, 535
Miscellaneous, 87, 174, 260, 362, 448, 536

Gynecology

Uterus, 87, 174, 260, 362, 448, 536
Adnexal and Periuterine Conditions, 88, 175, 261, 363, 449, 537
External Genitalia, 89, 175, 261, 363, 449, 537
Miscellaneous, 89, 175, 262, 364, 449, 537

Obstetrics

Pregnancy and Its Complications, 90, 176, 262, 364, 450, 538
Labor and Its Complications, 92, 177, 263, 365, 451, 539
Puerperium and Its Complications, 93, 178, 263, 366, 452, 540
Newborn, 93, 178, 264, 366, 452, 540
Miscellaneous, 93, 178, 264, 366, 452, 540

Genito-Urinary Surgery

Adrenal, Kidney, and Ureter, 94, 178, 264, 367, 453, 540
Bladder, Urethra, and Penis, 94, 179, 265, 368, 453, 541
Genital Organs, 95, 180, 266, 368, 454, 542
Miscellaneous, 95, 180, 266, 368, 454, 542

Surgery of the Bones, Joints, Muscles, Tendons

Conditions of the Bones, Joints, Muscles, Tendons, Etc., 95, 180, 266, 369, 455, 543
Surgery of the Bones, Joints, Muscles, Tendons, Etc., 97, 182, 268, 370, 456, 545
Fractures and Dislocations, 97, 182, 269, 371, 457, 546
Orthopedics in General, 98, 183, 371, 458, 547

Surgery of the Blood and Lymph Systems

Blood Vessels, 98, 183, 269, 372, 458, 547
Blood; Transfusion, 98, 184, 270, 372, 458, 547
Reticulo-Endothelial System, 99, 184, 270, 372, 548
Lymph Glands and Lymphatic Vessels, 99, 184, 270, 372, 459, 548

Surgical Technique

Operative Surgery and Technique; Postoperative Treatment, 99, 184, 270, 373, 459, 548
Antiseptic Surgery; Treatment of Wounds and Infections, 99, 185, 271, 373, 459, 548
Anæsthesia, 99, 185, 271, 373, 460, 548
Surgical Instruments and Apparatus, 100, 185, 374, 460, 549

Physicochemical Methods in Surgery

Roentgenology, 100, 185, 272, 374, 460, 549
Radium, 100, 186, 272, 374, 460, 550
Miscellaneous, 100, 186, 272, 374, 460, 550

Miscellaneous

Clinical Entities—General Physiological Conditions, 101, 186, 273, 375, 461, 550
General Bacterial, Protozoan, and Parasitic Infections, 101, 187, 273, 375, 461, 551
Ductless Glands, 101, 187, 274, 376, 462, 551
Surgical Pathology and Diagnosis, 102, 188, 274, 376, 462, 551
Experimental Surgery, 102, 274, 376, 462, 551
Hospitals; Medical Education and History, 102, 188, 274, 376, 552
Medical Jurisprudence, 102, 274, 376, 552
